EXPERIENCE

SERVICENOW | 07/2025 - Present

Role - Associate Software Engineer

- Created an AI Agent to automate resolution of findings, reducing manual effort.
- Driving a project built from scratch to establish best-practice code for an organisation of around 2500 developers.
- Working with ServiceNow SDK and other latest ServiceNow technologies to develop new tools.

SERVICENOW | 01/2025 - 06/2025

Role - Associate Software Engineer Intern

- Did a complete R&D on Fluent(a Typescript DSL), to expand its use across the organisation with more than 3000 people.
- Created an AI Agent to automate the task for resolving the findings created, reducing the manual effort.
- Got certified with CSA(Certified System Administrator) and CAD(Certified Application developer).

SERVICENOW | 05/2024 - 07/2024

Role - Associate Software Engineer Summer Intern

- Built a dashboard to showcase Now Assist features and products to customers.
- Integrated GenAI features into the ServiceNow microsite builder.
- Worked with AngularJS, REST APIs, JavaScript, and the ServiceNow platform.

EDUCATION

Lovely Professional University — **Phagwara, IN**
B.Tech(CSE) | 8.35 CGPA — 2021 - 25

Hindu Vidyapeeth — **Sonipat, IN**
High School | 85.6 % — 2020 - 21

PROJECTS

AgentFlow — AI Software Engineering Agent | 03/2026 - 04/2026

Tech stack - LangGraph, LangChain, RAG, MCP, Python, Next.js, GitHub API, Vector Database

- Building a stateful multi-agent system to decompose software tasks into planning, code analysis, implementation, testing, and review workflows.
- Designing RAG-based repository understanding using embeddings and vector search to retrieve relevant code and documentation.
- Integrating MCP-based developer tools and GitHub workflows for repository interaction and tool-assisted development.
- Designing automated testing and code-review stages to validate generated changes before user approval.

REVIBE | 02/2025 - 04/2025

Tech stack - Next.js, Tailwind CSS, MongoDB, Redis, Python, Scikit learn

- Built a full-stack mental wellness platform featuring mood tracking, personal goals, resources, and support-network management.
- Integrated Google Gemini 2.0 Flash to build an AI-powered conversational assistant and generate personalised insights from user's mood data.
- Implemented persistent chat history and real-time community communication using MongoDB, Redis, and Server-Sent Events (SSE).
- Developed authentication workflows including OTP verification, password reset, secure password hashing, and RESTful APIs.

TECHNICAL SKILLS

- Languages: Java, JavaScript, TypeScript, Python
- Frontend: HTML5, CSS3, SCSS, Bootstrap, React.js, Next.js
- Backend & APIs: Node.js, Express.js, RESTful APIs
- AI / GenAI: Generative AI, LLMs, RAG, AI Agents, LangGraph, MCP, Prompt Engineering, LLM APIs, Vector Databases, Tool Calling
- Databases: MongoDB, SQL,PostgreSQL RDBMS, NoSQL, Redis
- ServiceNow: ServiceNow Platform, UI Builder, AngularJS
- Core: Data Structures, Algorithms, Competitive Programming

CERTIFICATIONS

- **Certified Servicenow Administrator | ServiceNow** | 02/2025
  - Obtained the Certified ServiceNow Administrator certification from ServiceNow, validating advanced proficiency in configuring, managing, and maintaining the ServiceNow platform.
- **Certified Application Developer | ServiceNow** | 05/2025
  - Achieved the Certified Application Developer certification from ServiceNow, showcasing skills in designing and building advanced applications on the ServiceNow platform.

ACHIEVEMENTS

- Spearheaded a high-impact project leading to nomination at the prestigious Smart India Hackathon 2023, validating exceptional innovation and problem-solving skills, while collaborating with diverse teams to deliver solutions with significant societal impact.
- Solved more than 500 questions on Leetcode.
